Availability: January 2021

♣ Profile ♣

- Third year computing degree student attending the National College of Ireland (2:1 average)
- Experienced in graphic design and video editing using Adobe Photoshop, Premiere Pro, HitfilmExpress with some knowledge of photography.
- Highly computer literate with experience of using various applications and programming languages.
- Strong performance in database modules, covering relational, NoSQL and Data-warehousing, including research and implementation in project work.
- experience in Java, Object Orientated Programming, HTML, CSS, Android development, SQL and currently learning C# and MVC .Net applications.

♣ Education ♣

2019-Date| National College of Ireland | B.S.c (Hons) in Computing

Modules: Software Engineering, Advanced Programming, Advanced Databases, Object Oriented Programming, *Advanced Internet Technologies*, Business Entrepreneurship and Web Development
Course module in Appendix

2014-2019| School name, Moyle Park College, Co Dublin | Leaving Certificate

♣ Projects ♣

First year project: Developed a java GUI application based on a library of books that would present users with a matching item in the data which results the books that has been searched for. There is also a delete and add button so you are able to add or remove from the database. You will be able to save the current data so when the application closes no data will be lost. The project was my first implementation of software engineering, class design and greatly helped in my learning of Object Orientated Programming in Java.

Second Year Project: A web application based on a car shop using XML with associated XSLT and XML Schemas files. The XML content is retrieved and updated on an existing database. JavaScript/AJAX technologies were used for making dynamic web pages.

♣ Interests and Hobbies ♣

Technology:

- I read IT related articles and blogs following new technologies and trends such as <http://www.siliconrepublic.com/>, <http://www.redmondpie.com> and <http://9to5mac.com/> on a regular basis.
- I'm a fan at watching computer engineers do their work online an example is TechLead who has worked for several companies such as google and Facebook at the pass.
- I am part of the Computer Innovation Society, which was set up in NCI in 2011.

Referees Available Upon Request

Appendix

BSc(Hons) Technology Management	Year 2	2020 – 2021
--	---------------	--------------------

Advanced Databases
Business Entrepreneurship
Data Communications and Networking
Data Structures and Algorithms
Introduction to Databases
Introduction to Software Engineering
Object Oriented Software Engineering
Project
Information Technology Management
Web Development

BSc(Hons) Technology Management	Year 1	2019 – 2020
--	---------------	--------------------

Computer Architecture
Introduction to Computers
Introduction to Mathematics for Computers
Introduction to Multimedia
Introduction to Programming
Managerial Foundations of Information Systems
Object Oriented Programming
Operating Systems
Personal and Professional Development
XHTML & Web Design
